Hal yang bisa terjadi:

- Double booking
- Jadwal meeting tertunda/batal
- Perubahan mendadak tanpa info
- Laporan booking bisa hilang

Meeting Room Scheduling Display

User Interface Design

Room display 6 takes room signage design to an unprecedented level, beautifully completing the office decor. Stylish, ambient light effects, combined with clear, yet harmonious color palettes, contribute to highly intuitive UI and productive tool-an integral part of a modern, digitalized office.

User Interface Design

With the new amenities filtering function, you can easily find and manage bookings for other rooms in the office, right on the display.

New Scrollable Timeline

The newly designed scrollable and interactive timeline blends in beautifully on the home screen and provides superb overview of daily events.

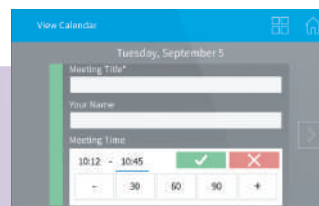

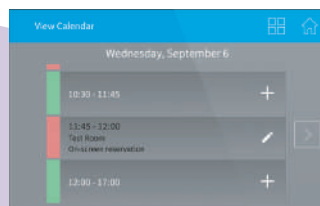

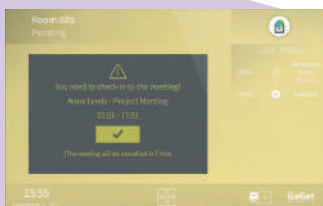

Check-in with host reminder

If activated users have to manually check into meetings within a specified time rang. Optionally, hosts will receive a mail notification when a meeting check in is due.

Show meeting attendees

When this option is enable, room display 6 will automatically show not only the host, but also other meeting attendees.
